

# Complex products. Clear next steps.

I make AI and information-rich products  
easier to understand.

---

Selected design work, 2023–2026

# A useful first question

UX Designer & Researcher (Contract)  
2025–2026

I explored suggested questions and a question library while keeping a person's own question close at hand.

Design deliverables and engineering handoff

Mobile and desktop conversation flows

# Waiting is part of the conversation

I kept the question visible and gave the response a distinct waiting state.

Animation was an implementation question to resolve with engineering.

Original state detail

# Recovery follows the failure

An incomplete answer and a lost connection need different next actions.

I assembled the flows and their next actions into an annotated handoff for engineering.

## Incomplete answer

## Connection lost

# Feedback with context

UX Designer & Researcher (Contract), 2026

I connected a personal summary to its supporting observations and a useful next action.

Design iterations shown with sample content.  
Web/server release confirmed September 2, 2026.

## Your safety focus this week

Repeated lift-plan checks showed up across your recent observations.

Your recent work suggests the crew is paying closer attention to lift planning, but **pinch-point hazards** still need a quick reminder.

✓ Based on 5 observations and 2 conversations

View why

Use this in today's pre-task

# A comparison needs an interpretation

Mentioning fatigue less often is a comparison. Whether that is good depends on the context.

I raised the cohort, percentile and wording questions before they became interface rules.

Original widget, illustrative values

# Competing entry points

Training an assistant, starting a Vibecheck and requesting support competed at the same entry point.

I used the audit to make these choices explicit for the team's review.

Usability evaluation and design recommendations

# Error feedback beside the field

I made the correction visible where a person could act on it.

The recommendation gave the team a specific behavior to discuss and prioritize.

Original

The original login form is titled "Ready, Set..." with the subtitle "Log in to access your account". It features two input fields: "Email Address" and "Password". The "Password" field has a toggle icon on the right. Below the fields are two buttons: "Log In" and "Send Me A One-Time Login Link".

Original error at the page footer

Error: Invalid login credentials

Proposed

The proposed login form is identical to the original, but with a red border around the "Password" field. A green feedback message "Incorrect Password" is displayed to the right of the field. The "Log In" and "Send Me A One-Time Login Link" buttons remain below the fields.

Proposed feedback beside the field

# I started by listening to people's stories

Documentary filmmaking taught me to listen closely and find the thread in a complicated story.

Those habits stayed with me in research and design. Outside work, I run tabletop games, where listening and helping a group find its way matter too.

# Let's make the next step clearer

For product and UX design roles, contract projects, and collaborations.
