

Complex products. Clear next steps.

I make AI and information-rich products
easier to understand.

Selected design work, 2023–2026

A useful first question

BEFORE

An empty field and broad categories.

MY DESIGN EXPLORATION

Specific suggestions, ready to edit.

Waiting is part of the conversation

I kept the question visible and gave the response a distinct waiting state.

Animation was an implementation question to resolve with engineering.

Original state detail

Recovery follows the failure

An incomplete answer and a lost connection need different next actions.

An August 2026 engineering reply confirmed implementation of the approved error states. The exact pictured variants remain unverified.

Incomplete answer

Connection lost

Feedback with context

UX Designer & Researcher (Contract), 2026

I connected a personal summary to its supporting observations and a useful next action.

Design iterations shown with sample content.
Web/server release confirmed September 2, 2026.

Your safety focus this week

Repeated lift-plan checks showed up across your recent observations.

Your recent work suggests the crew is paying closer attention to lift planning, but **pinch-point hazards** still need a quick reminder.

✓ Based on 5 observations and 2 conversations

View why

Use this in today's pre-task

A comparison needs an interpretation

Mentioning fatigue less often is a comparison. Whether that is good depends on the context.

I raised the cohort, percentile and wording questions before they became interface rules.

Original widget, illustrative values

Competing entry points

Training an assistant, starting a Vibecheck and requesting support competed at the same entry point.

I used the audit to make these choices explicit for the team's review.

Error feedback beside the field

ORIGINAL

The error sat away from the login fields.

The original login form is titled "Ready, Set..." and includes the instruction "Log in to access your account". It features two input fields: "Email Address" and "Password". The "Password" field has a small eye icon for toggling visibility. Below the fields are two buttons: "Log In" and "Send Me A One-Time Login Link". In this original design, any error message would be placed separately from the fields.

Separate page-footer message:

Error: Invalid login credentials

MY RECOMMENDATION

Place the correction beside the field.

The recommended login form is identical to the original but includes an error feedback mechanism. The "Password" field is highlighted with a red border, and a green message bubble labeled "Incorrect Password" is positioned to its right. The rest of the form, including the "Email Address" field, buttons, and title, remains the same.

Original recommendation artifact.
Exact shipped variant and usability impact unverified.

I started by listening to people's stories

Documentary filmmaking taught me to listen closely and find the thread in a complicated story.

Those habits stayed with me in research and design. Outside work, I run tabletop games, where listening and helping a group find its way matter too.

Let's make the next step clearer

For product and UX design roles, contract projects, and collaborations.
