Selected design work, 2023–2026

A useful first question

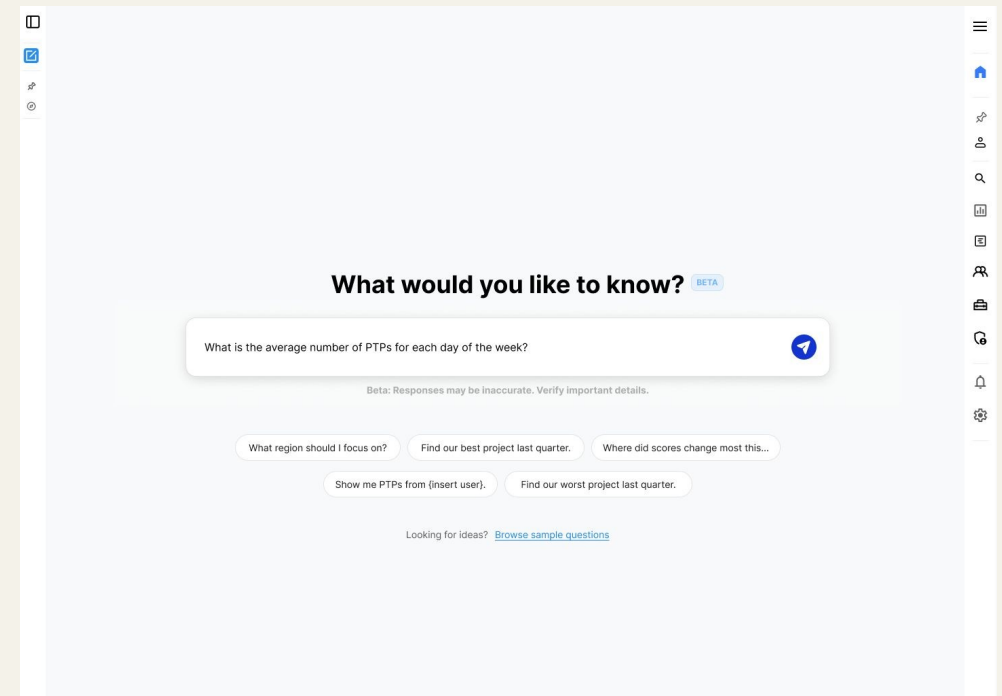

BEFORE

An empty field and broad categories.

MY DESIGN EXPLORATION

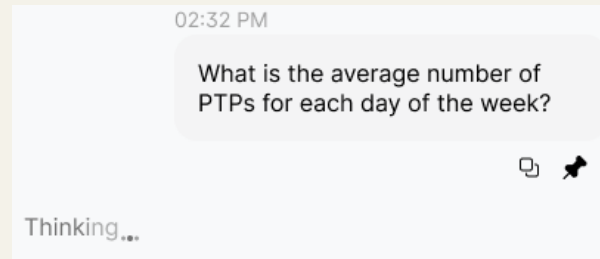

Specific suggestions, ready to edit.

Waiting is part of the conversation

I kept the question visible and gave the response a distinct waiting state.

Animation was an implementation question to resolve with engineering.

Original state detail

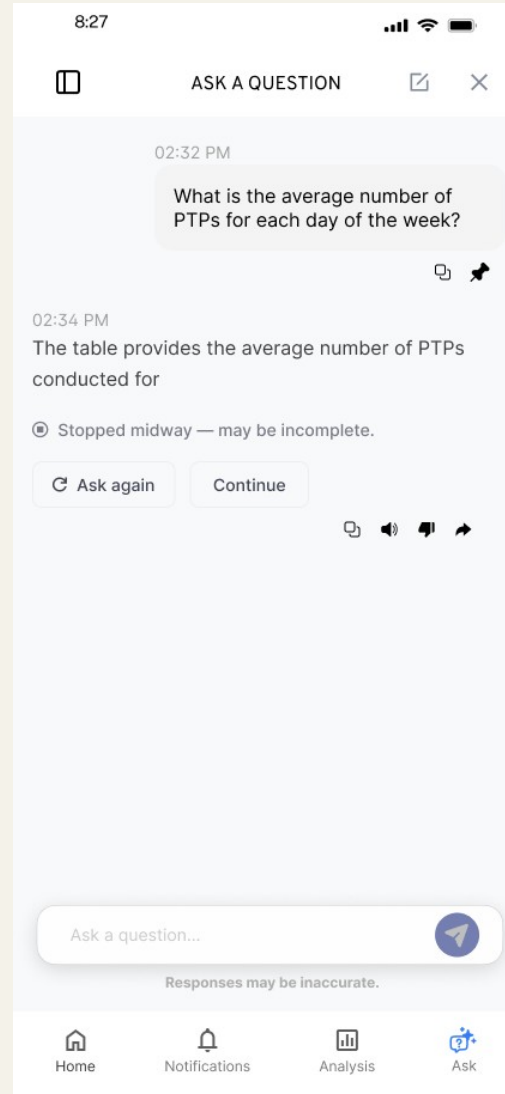

Recovery follows the failure

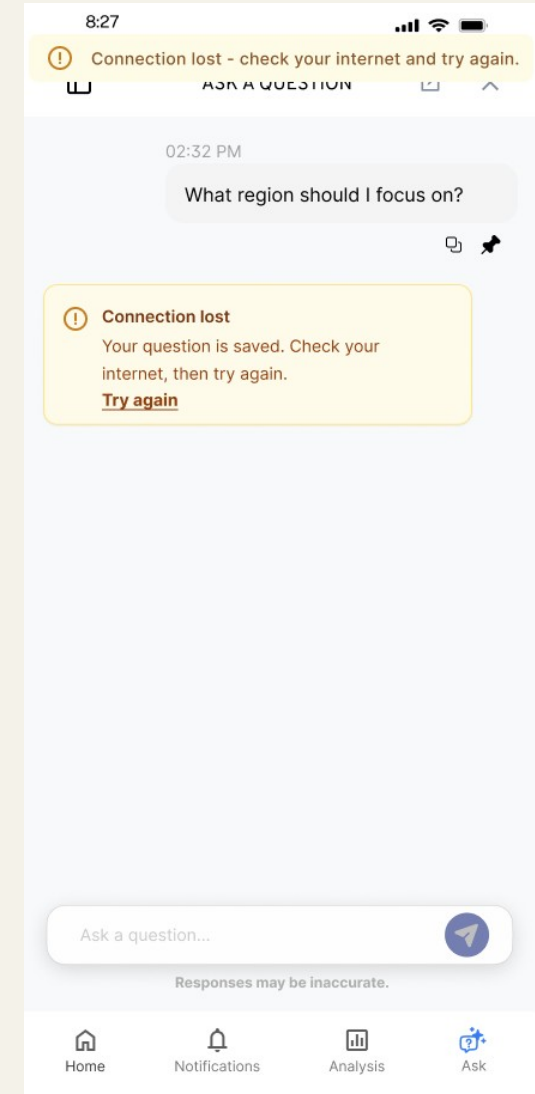

An incomplete answer and a lost connection need different next actions.

An August 2026 engineering reply confirmed implementation of the approved error states. The exact pictured variants remain unverified.

Incomplete answer

Connection lost

Feedback with context

UX Designer & Researcher (Contract), 2026

I connected a personal summary to its supporting observations and a useful next action.

Design iterations with sample content. Engineering reported web/server live September 2 and mobile live September 3, 2026.

Your safety focus this week

Repeated lift-plan checks showed up across your recent observations.

Your recent work suggests the crew is paying closer attention to lift planning, but **pinch-point hazards** still need a quick reminder.

✓ Based on 5 observations and 2 conversations

When the table held more information

My grid omitted details already present in engineering’s table.

I recommended keeping the table and revised the labels to make given and received activity clearer.

Original design detail, August 2026 · values are sample content · followed-people link deferred

Table direction with clearer activity labels

A comparison needs an interpretation

Mentioning fatigue less often is a comparison. Whether that is good depends on the context.

I raised the cohort, percentile and wording questions before they became interface rules.

Original widget, illustrative values

From an observation to action

A flagged answer can lead to a specific next action inside the existing observation flow.

I kept the entry contextual and separated issue creation from approval requests.

September 8 design captures. Engineering reported core Workflow live September 23, 2026.

The image shows a mobile app interface. At the top, there's a question: "Was Stretch & Flex Conducted?". Below the question are three buttons: "Safe", "At Risk" (which is highlighted with a red border), and "N/A". Below these buttons is a link that says "Add detail". Below this section is a vertical list of five action buttons: "Take Photo or Video", "Choose from Library", "Add a Note", "Add Open Issue", and "Cancel".

Was Stretch & Flex Conducted?

Safe At Risk N/A

Add a Note

Add Open Issue

Cancel

Shared fields, different decisions

OPEN ISSUE

Open status

No required assignee marker

The 'Add Open Issue' form is displayed on a mobile device screen. It features a title 'Add Open Issue' and a subtitle 'Please provide details for the new issue.' Below the subtitle are four input fields: 'Assigned to' (a dropdown menu with 'Select a user' as the placeholder), 'Contractor' (a dropdown menu with 'Select a contractor' as the placeholder), 'Status' (a dropdown menu with 'Open' as the selected value and an asterisk indicating it is required), and 'Due date' (a date picker with 'MM/dd/yyyy' as the placeholder). To the right of the 'Due date' field is a 'Severity' field (a dropdown menu with 'Select' as the placeholder and an asterisk indicating it is required).

REQUEST APPROVAL

Awaiting approval

Required assignee marker

The 'Request Approval' form is displayed on a mobile device screen. It features a title 'Request Approval' and a subtitle 'Please provide details for the approval request.' Below the subtitle are four input fields: 'Assigned to' (a dropdown menu with 'Select a user' as the placeholder and an asterisk indicating it is required), 'Contractor' (a dropdown menu with 'Select a contractor' as the placeholder), 'Status' (a dropdown menu with 'Awaiting approval' as the selected value and an asterisk indicating it is required), and 'Due date' (a date picker with 'MM/dd/yyyy' as the placeholder). To the right of the 'Due date' field is a 'Severity' field (a dropdown menu with 'Select' as the placeholder and an asterisk indicating it is required).

A smaller camera fix, with room to grow

A demo exposed competing controls while someone recorded and reviewed a form.

Current handoff: keep the split screen, remove the problematic bottom Submit, and retain existing preview and Retake/Use Video actions.

Future direction: a draggable picture-in-picture view could give the form more room. That benefit remains a design hypothesis.

Original design and April handoff · implementation and retest unverified

Competing entry points

Training an assistant, starting a Vibecheck and requesting support competed at the same entry point.

I used the audit to make these choices explicit for the team's review.

Error feedback beside the field

ORIGINAL

The error sat away from the login fields.

A login form titled "Ready, Set..." with the subtitle "Log in to access your account". It features two input fields: "Email Address" and "Password". Below the fields are two buttons: "Log In" and "Send Me A One-Time Login Link". The form is set against a light blue background.

Separate page-footer message:

Error: Invalid login credentials

MY RECOMMENDATION

Place the correction beside the field.

A login form titled "Ready, Set..." with the subtitle "Log in to access your account". It features two input fields: "Email Address" and "Password". The "Password" field is highlighted with a red border, and a green error message "Incorrect Password" is displayed to its right. Below the fields are two buttons: "Log In" and "Send Me A One-Time Login Link". The form is set against a light blue background.

Original recommendation artifact.
Exact shipped variant and usability impact unverified.

THE THREAD THROUGH MY WORK

I started by listening to people's stories

Documentary filmmaking taught me to listen closely and find the thread in a complicated story.

Those habits stayed with me in research and design. Outside work, I run tabletop games, where listening and helping a group find its way matter too.

Let's make the next step clearer

For product and UX design roles, contract projects, and collaborations.
