

Make the next step something people can do

Instructional design, hands-on AI teaching,
and workshops that leave a team something to build on.

Coursera instructor · ASU learning design · KeepMake workshops

Begin with a task the learner can recognize

A fictional café gives a beginner an audience, a message, and a reason to revise an AI-generated post.

My work: objectives, practice tasks, lesson materials, demonstrations, and production revisions.

TASK OBJECTIVE

Task 3

Goals

Iteratively Transform Content Using AI

- Use ChatGPT to create an initial draft and make iterative refinements.
- Practice refining drafts using different prompt techniques and feedback loops.
- Analyze how each iteration impacts content quality and alignment with goals.

coursera

Original lesson slide · fictional Brew Bliss scenario

Make a revision visible enough to judge

01 Initial request and draft

Craft a post about Visit Brew Bliss for a great coffee experience.

 **Visit Brew Bliss for an Unforgettable Coffee Experience!** 

Whether you're a seasoned coffee connoisseur or just in need of your daily caffeine fix, Brew Bliss has something special for you. Our cozy, family-owned café offers a warm and welcoming atmosphere paired with expertly crafted coffee that will elevate your day. From rich, aromatic espressos to indulgent lattes, every sip at Brew Bliss is a step towards coffee nirvana. Come for the coffee, stay for the experience. We can't wait to brew up some bliss for you!

#BrewBliss #CoffeeLovers #CaféExperience #DrinkLocal

02 A specific instruction to refine it

Can you make this more engaging and inviting? Include sensory details and a friendly tone. Enhance it with substantance and a call to actions that includes essence what brings a coffee Enthusiasts their love for coffee.

The assessment improved through specific critique

REVIEW FINDING

Distractors were easy to eliminate

Question 7 tested a definition

Retry feedback revealed the answer

MY DOCUMENTED REVISION

Reworked answer choices, especially Q7, Q8, and Q10.

Added application of the concept in context.

Made feedback neutral and corrected lesson references.

Give a team something concrete to think with

I designed an in-person sequence combining opportunity statements, individual sketches, gallery sharing, and planned prioritization.

The ideas were collaborative. My contribution was the activity sequence, documentation, and synthesis support.

Original team material · Board of Innovation worksheet

Frame the question before choosing a feature

- 01 **Frame**
Opportunity statements + How Might We
- 02 **Make**
Individual Year in Review sketches
- 03 **Compare**
Gallery sharing + themes + Now / Next / Later

Planned sequence, not verified actual timings.
Photo: team worksheet; template by Board of Innovation.

Keep the ideas and their context together

Pink notes capture concerns.
Yellow notes suggest directions.

The retained workshop record and June follow-on discussion gave the team material to revisit, question, and develop.

These are team-generated ideas, not user-validated findings or proof of shipped features.

Keep a mentor in the learning loop

I proposed human review before learner context became a generated task—and again before that task reached the learner.

Design proposal. Deployment, learner outcomes, and time savings were not established.

REVIEW GATE 01

REVIEW GATE 02

Selected reconstruction of my proposal

Listen closely. Make room to try.

Documentary storytelling taught me to listen.
Learning design and UX taught me to notice where
an explanation stops helping.

I bring that attention to a learner comparing two drafts, a
team sketching an idea, and a group finding its next step
together.

What should people be able to do next?

Instructional design · AI literacy · learning experiences
customer education · workshop facilitation
